reduction

HOW STORYBOARD WORKS

Platform:

- Runs as an app on driver tablets—no new hardware required
- Single sign-on supported
- Delivers updates and alerts verbally in the background
- Integrates with your existing systems

AI Workers:

- Trigger messages automatically based on real-time events
- Handle driver questions, coaching, and requests—pulling in the right information and guiding next steps
- Run 24/7 without manual oversight

“These audible alerts have saved us valuable time and this benefit alone is immeasurable. In the past, monitoring was done manually by dispatch and there could be a critical violation if we didn’t communicate with a driver in a timely manner.”

Brian Buchanan
COMPLIANCE MANAGER

“Storyboard gives me what I need while I’m driving—without the distractions”
