

Prevent violations before they happen with Storyboard's CSA Compliance Agent

Always-on coaching that works even when your team clocks out.

CHALLENGES

- Dispatchers had to pull reports and remind drivers
- Their ELD offered only visual alerts that drivers would miss or ignore
- Logs go uncertified without consistent reminders
- Violations increase CSA risk, insurance costs, and accident exposure

SOLUTION

These fleets implemented Storyboard's CSA Compliance Agent to:

- Alert drivers before 30-minute, 11-hour, and 14-hour violations
- Remind drivers to certify logs before they start driving
- Ensure compliance without relying on screens or human intervention

RESULTS

- Eliminated clock violations since deployment
- Drivers certify logs up to 4x faster
- No weekend or after-hours monitoring required
- Office team went from managing spreadsheets to managing people

100% reduction in service clock violations

**In the first 8 weeks after feature deployment.*

4x faster log certifications

***In the first 2 weeks after feature deployment.*

We have very, very good CSA scores... we're actually seeing a decline in our insurance premiums this year, which is really unusual in this industry.
